

HEAD OF DEVELOPMENT AT BRAVE DIGITAL

Hi, I'm

FJ Lessing

As Head of Development at BRAVE Digital, I lead a team of talented developers delivering software for a diverse client base. I focus on **scoping and architecting projects**, **overseeing developer growth** and wellbeing, guiding technical strategy, and shipping quality work on time and within budget.
I now manage agents as well as developers. I decide where an agent gets work, how it gets context, how far it can act on its own, and how its output is checked.
Under all of it is full-stack experience with TypeScript, Laravel, Node.js, Vue and React, mobile apps with Flutter, React Native and Swift, and DevOps across servers and cloud.

EDUCATION

BIS Multimedia
University of
Pretoria,
2011-2016

WORK EXPERIENCE

HEAD OF DEVELOPMENT 2021 - Present
BRAVE Digital

Lead a team of around 5-10 developers and set how the team adopts AI and agentic development: how context is given, how agents are set up, where an agent can act on its own, and how AI-generated code is reviewed before it ships. Also responsible for scoping and architecture, technical strategy, developer growth and DevOps. I still work as a senior developer on projects to help the team hit budgets and deadlines.

AI Agents · Claude · TypeScript · Laravel · Node.js · Vue · React · Flutter · AWS · DevOps

FULL-STACK DEVELOPER 2015 - 2021
BRAVE Digital

Worked as a full-stack software developer using Laravel, Node.js, Vue, and React. Developed mobile apps with Flutter, React Native, Cordova, and Swift. Worked on complex software solutions for startups and corporate clients. Developed experimental projects including Unity and VR applications.

Laravel · Node.js · Vue · React · Flutter · React Native · Unity · VR

WORK EXPERIENCE CONT. →

WORK EXPERIENCE CONT.

CONSULTANT/DEVELOPER 2014 - Present

Freelance

Independent work for clients across industries, increasingly AI-led. I review AI-generated code for correctness, and on my last two platforms built a review harness into the codebase with AGENTS.md and Skills. Shipped two sites built end to end with AI.

AI Code Review | Agentic Development | Full-Stack | Agent Skills Development | Web Development | Consulting

SKILLS & TECHNOLOGIES

AI & Agentic Engineering

Agentic Development | Agent Design & Orchestration | Claude Code | OpenCode | Spec-driven Engineering | MCP | Anthropic API | OpenAI API | Python for AI & Data | AI-Assisted Testing | AI-Driven Data Migration

Core Skills

AI Integration | Software Engineering | Web Development | Server Architecture | Solution Architecture | Software Development | Mobile App Development

Languages

HTML | CSS | JavaScript | TypeScript | Dart | Go | PHP | SQL | Python | Java | C#

Frameworks

Laravel | Node.js | Vue | Angular | React Native | WordPress | Tailwind | Bootstrap | SASS | React | Flutter

Tools & DevOps

Linux | Git | Docker | AWS | Google Cloud Platform | MySQL | PostgreSQL | Apache | Nginx | GitHub CI/CD | Bitbucket Pipelines
